### Projects

- **Unsinkable Ships**
  - The idea was to keep ship buoyancy always intact. This was done by changing the physical property of metal used in construction of ship and doing design improvisations in construction of the vessel. The etching technique was used to create the material of metal. Self-righting methods were used for design improvisations.
- **Ship with various new features**
  - Use electromagnet concept for berthing of ship near port
  - Put a wind mill on the top of the ship to use the wind energy and to generate some power ( can be used for the operation of auxiliary machine in the engine room )
  - Use solar plates along with sails to generate some electricity on board ship.
